NAWAF NAOFAL

Web Development | Game Development Enthusiast

+6282127291418 nawafnaufal@gmail.com Jakarta, Indonesia

PROFILE

Full-Stack & Game Developer with a strong foundation in core programming logic and practical experience in AI-assisted development. Proficient in building modern web applications using Next.js, React, Vue.js, and Tailwind CSS, alongside backend architecture, database management, and API development using frameworks like Laravel. Also experienced in game programming, utilizing C# in Unity and C++/Visual Scripting in Unreal Engine. By combining solid programming fundamentals with modern AI-driven workflows, I focus on delivering functional and efficient digital experiences.

EDUCATION

Universitas Logistik dan Bisnis Internasion | Graduated 2024

IInformatics Engineering

- Succesfully completed all coursework and bachelor thesis
- GPA: 3.78
- Attend the Certified Independent Study and Internship Program (MSIB)

CORE SKILLS

- Front-End: JavaScript, Vue, React, CSS, Bootstrap, Next.js
- Back-End: Laravel, Express.js, Next.js
- Version Control: Git, Github
- Game Development: Unity (C#), Unreal Engine (Visual Scripting, C++)
- Collaboration: Teamwork, Communication
- Learning & Development: Continuous Improvement, Adaptability to New Technology

PUBLICATION

- Golang Programming for Beginners: Dataset Processing
- Online Store with Laravel and Vue.js
- Identification of Low-Rate Distributed Denial of Service Attacks in Networks Using the AdaBoost Algorithm

EXPERIENCE

Project II | 2021 - 2022

E-Commerce Information System at Az-Zahra Shop

- Led the development of an e-commerce information system for Az-Zahra Shop using the laravel framework
- Implemented key features to enhance the shop's online presence and improve customer experience

MSIB Infinite Leaning Indonesia | 2024

Local Game Development - Game Programmer

- Developed 2D and 3D games using C# and Unity3D, managing core game physics, OOP logic, UI/UX, and asset production.
- Collaborated with mentors and peers to deliver functional, high-quality gameplay projects under tight deadlines.

J - FORCES | 2024 - Present

Web Development

- Full-Stack Development: Built web applications from scratch utilizing React (Vite) and Tailwind CSS for the front-end, paired with Express.js and PHP/MySQL for backend services and database management.
- 3D & Interactive Features: Developed immersive 3D product showcases using Three.js, allowing users to rotate, zoom, and interact with military equipment models via clickable hotspots that reveal detailed specifications.
- Advanced Animations: Crafted highly dynamic and engaging user interfaces by implementing seamless web animations through GSAP.
